Year of birth |__|__|__|

Sex (1=male, 2=female) |__|

Height (cm) |__|__|

Weight (kg) |__|__|

Date written Informed Consent COLOR III study |__|__||__|__||__|__|

Inclusion criteria

- 1) Solitary adenocarcinoma of the rectum within 10 cm from anal verge defined by MRI
- 2) Stage 1-3 according to the AJCC classification including downstaged tumours based on adequate imaging of the thorax and abdomen
- 3) Intention for Low Anterior Resection (LAR) with total mesorectal excision(TME) with an anastomosis either colorectal or coloanal
- 4) Suitable for elective laparoscopic surgical resection
- 5) Informed consent according to local requirements

Exclusion criteria

- 1) T3 tumour with margins less than 1 mm to the mesorectal fascia or T4 tumour, determined by MRI-scan (staged after (chemo)radiotherapy if applicable)
- 2) Intention to perform no anastomosis(APR)
- 3) Malignancy other than adenocarcinoma at histological examination
- 4) Patients under 18 years of age
- 5) Pregnancy
- 6) Previous radical prostatectomy or rectal surgery (excluding TURP or local excision)
- 7) Signs of acute intestinal obstruction
- 8) Multiple colorectal tumours
- 9) Familial Adenomatosis Polyposis Coli (FAP), Hereditary Non-Polyposis Colorectal Cancer (HNPCC), active Crohn's disease or active ulcerative colitis
- 10) Planned synchronous abdominal organ resections
- 11) Other malignancies in medical history, except adequately treated basocellular carcinoma of the skin or in situ carcinoma of the cervix uteri, in the last 5 years
- 12) Absolute contraindication to general anaesthesia

Does this patient fulfil all eligibility criteria?(0=No, 1=Yes) |__|
